

problem 1

Submissions Detail - Not Boring Movies

Accepted 10 / 10 testcases passed

 Ziad M Fouad submitted at Jan 24, 2026 22:40

 Editorial

 Solution

 Runtime

274 ms | Beats 37.70%

 Analyze Complexity

Code | MS SQL Server

```
1 /* Write your T-SQL query statement below */
2 select *
3 from Cinema
4 where id % 2 != 0 and [description] != 'boring'
5 order by rating desc
6 ;
```

problem 2

Submissions Detail - Project Employees I

Accepted 8 / 8 testcases passed

Ziad M Fouad submitted at Jan 30, 2026 14:06

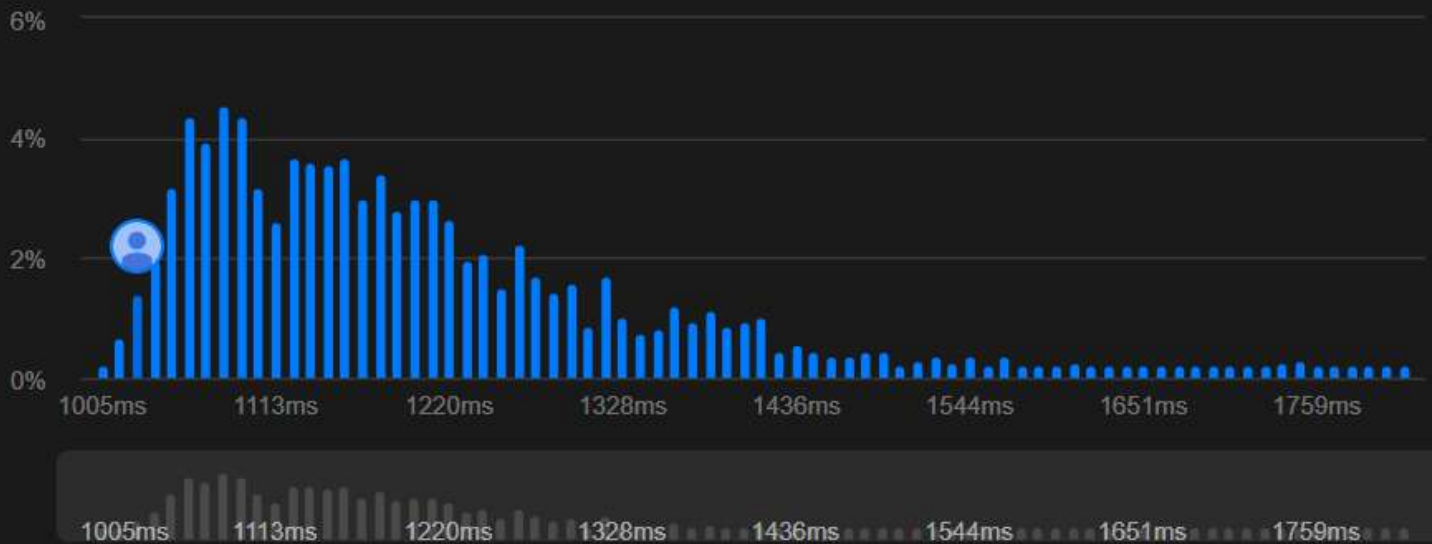

Editorial

Solution

Runtime

1036 ms | Beats 97.59%

Analyze Complexity

Code | MS SQL Server

```
1 /* Write your T-SQL query statement below */
2 select project_id ,
3 round(avg(experience_years * 1.0), 2) as average_years
4 from Project
5 inner join Employee
6 on Project.employee_id = Employee.employee_id
7 group by project_id
8 order by project_id asc;
```

problem 3

Submissions Detail - Monthly Transactions I

Accepted 16 / 16 testcases passed

[Solution](#)

 **Ziad M Fouad** submitted at Jan 24, 2026 23:21

 Runtime

1456 ms | Beats **71.62%** 

 [Analyze Complexity](#)

```
1  /* Write your T-SQL query statement below */
2  select format(trans_date, 'yyyy-MM') as [month] , country ,
3  count(*) as trans_count ,
4  count(case when [state] = 'approved' then 1 else null end) as approved_count ,
5  sum(amount) as trans_total_amount ,
6  sum(case when [state] = 'approved' then amount else 0 end) as approved_total_amount
7  from Transactions
8  group by format(trans_date, 'yyyy-MM') , country;
```

problem 4

Submissions
Detail -

Number of Unique Subjects Taught by Each
Teacher

Accepted 14 / 14 testcases passed

Ziad M Fouad submitted at Jan 24, 2026 23:33

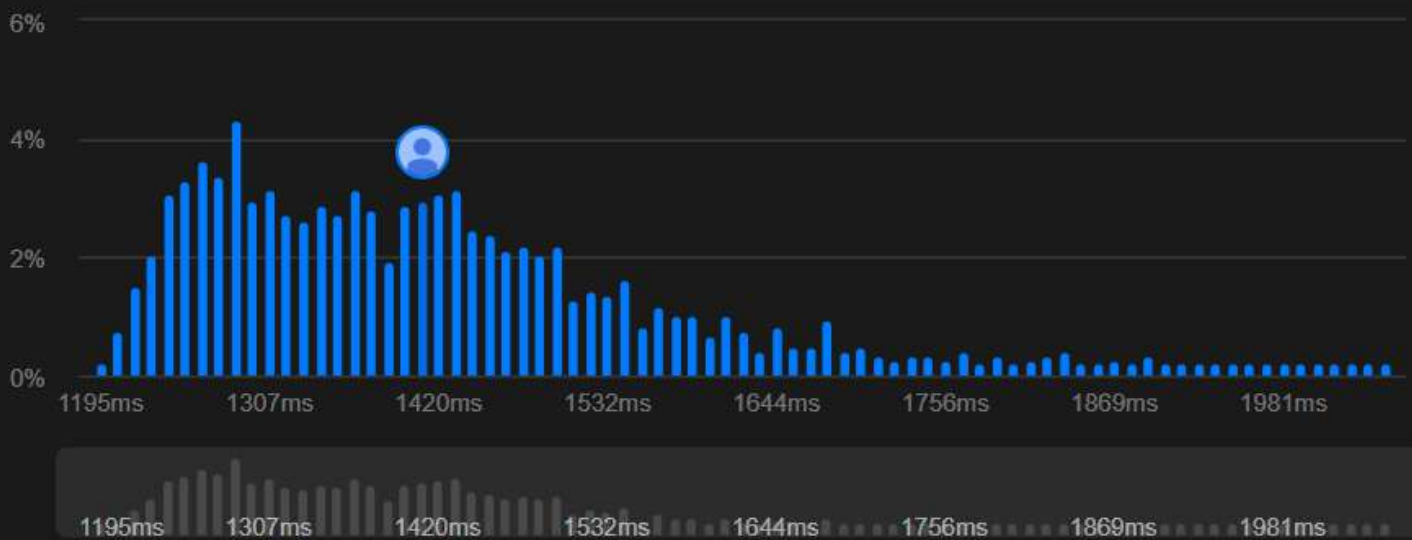

Editorial

Solution

Runtime

1413 ms | Beats 47.92%

Analyze Complexity

Code | MS SQL Server

```
1 /* Write your T-SQL query statement below */
2 select teacher_id , count(distinct subject_id) as cnt
3 from Teacher
4 group by teacher_id;
```

problem 5

Submissions Detail -

Employees Whose Manager Left the Company

Accepted 13 / 13 testcases passed

 **Ziad M Fouad** submitted at Jan 24, 2026 23:41

 **Solution**

🕒 Runtime

378 ms | Beats **62.14%** 🏆

🔮 [Analyze Complexity](#)

Code | MS SQL Server

```
1 /* Write your T-SQL query statement below */
2 select employee_id
3 from Employees
4 where salary < 30000 and manager_id not in (select employee_id from Employees)
5 order by employee_id;
```

problem 6

Submissions Detail - Exchange Seats

Accepted 14 / 14 testcases passed

 **Ziad M Fouad** submitted at Jan 26, 2026 00:14

 Editorial

 Solution

🕒 Runtime

283 ms | Beats **73.22%** 🏆

🌟 [Analyze Complexity](#)

Code | MS SQL Server

```
1 /* Write your T-SQL query statement below */
2 -- select (case when id % 2 = 0 then id - 1 else id + 1 end) as id , student
3 select ( case when id = ( select count(*) from Seat )
4         and (select count(*) from Seat) % 2 = 1 then id else
5         ( case when id % 2 = 0 then id - 1 else id + 1 end )
6 end ) as id , student
7 from Seat
8 order by id asc;
```

problem 7

Submissions Detail - Primary Department for Each Employee

Accepted 23 / 23 testcases passed

Ziad M Fouad submitted at Jan 26, 2026 00:52

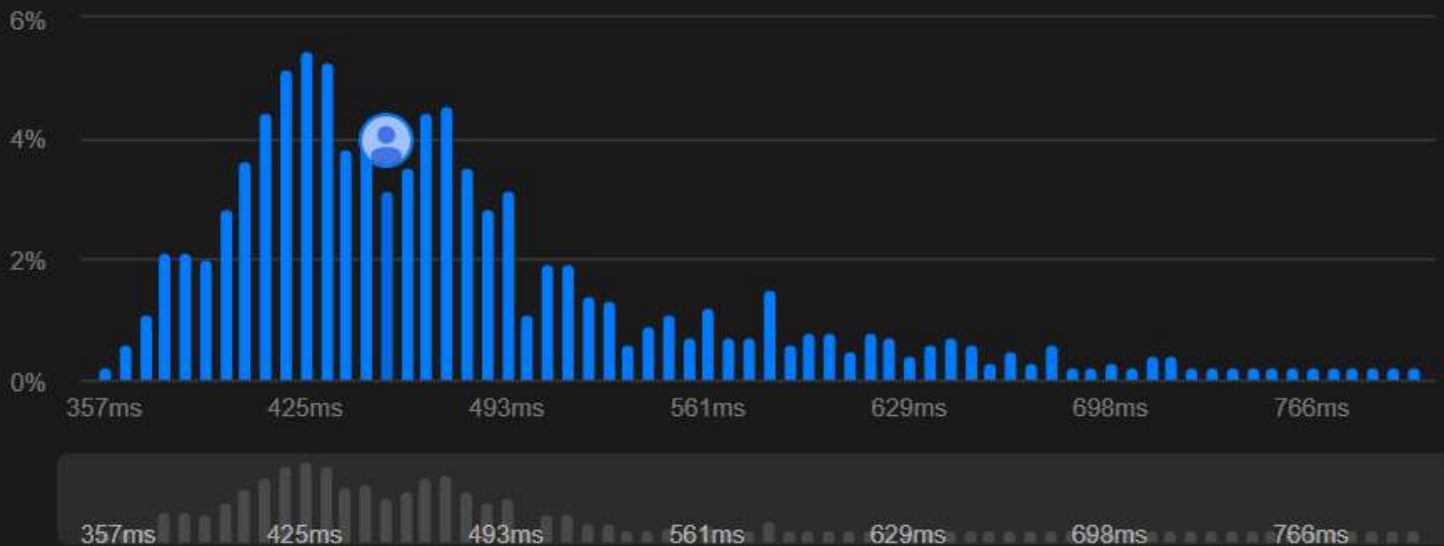

Editorial

Solution

Runtime

455 ms | Beats 55.52%

Analyze Complexity

Code | MS SQL Server

```
1 /* Write your T-SQL query statement below */
2 select employee_id , department_id
3 from Employee
4 where primary_flag = 'Y' or employee_id in (
5     select employee_id
6     from Employee
7     group by employee_id
8     having count(*) = 1
9 )
```
